# Celebrating tradition: the timeless elegance of italian porcelain surfaces

## *The company*

At ICG ITALIA, we don't merely offer Italian porcelain surfaces; we embody the essence of Italian tradition. Our commitment extends beyond fast fashion—it's about delivering timeless and classic Italian appeal that resonates across generations. Our luxurious ceramics are meticulously crafted in the picturesque town of Sassuolo, nestled within Italy's Modena province. This region boasts a rich heritage of artisanal craftsmanship, and we take immense pride in producing our surfaces there. We are proud heirs of Italian craftsmanship and passionate interpreters of the "Made in Italy" legacy.

## *High-end surfaces*

Our expertise in high-end porcelain surfaces is multifaceted. Manufactured in Italy, where the finest porcelain is found, our slabs embody a legacy of craftsmanship. But it doesn't stop there. We integrate cutting-edge technologies into our products such as Design Your Slab (DYS), empowering customers to imprint custom designs onto our large-format surfaces, and 4D technology, which seamlessly infuses veining, patterns, and color variations throughout the material. These innovations, combined with an extended list of benefits, position us as providers of exceptional solutions in the market. When you choose our porcelain, you're not just selecting a surface; you're embracing a legacy of sophistication and quality.

# Sustainable Excellence: ICG Italia's green building philosophy

***Economy=Ecology*** We firmly believe that ecological responsibility and economic viability go hand in hand. Our production philosophy revolves around sustainable architecture, creating ceramics that excel in both technical and aesthetic performance while adhering to green building principles. Since our company's inception, environmental protection and pollution prevention have been woven into our corporate DNA. These principles drive our ambitious goals, setting us apart globally.

The phrase 'Economy =Ecology' encapsulates our ethos—a concept championed by our founder in the 1970s when ecological awareness was nascent. Today, it remains etched onto our production lines as a constant reminder. Whether our ceramic and porcelain surfaces grace residential kitchens or iconic commercial spaces, we honor nature. Sustainability isn't just a choice; it's an imperative. By marrying ecology and economy, we pave the way for a greener, more prosperous future—one surface at a time.

“Sustainability isn't  
just a choice; it's an  
imperative”

# A text about the Slabs.

## *Slabs and ICG know-how*

Discover our large-format porcelain slabs from ICG Italia: lighter than a summer breeze, yet exuding luxurious allure. Perfect for floors, walls, façades, these slabs redefine elegance effortlessly.

Whether modern or classic, our diverse range offers endless design possibilities. With lightweight yet durable construction, they're ideal for easy installation and maintenance in any residential or commercial space.

Elevate your interiors with ICG Italia — where luxury meets technology.

## *Destination of use*

Collections, materials and surfaces can be coordinated to put together an unmatched assortment of materials, sizes, thicknesses and finishes. Architects are thus offered the best possible solution for the technical and aesthetic requirements of all their projects.

## *Transform Your Kitchen with ICG Italia's Luxurious Porcelain Slabs*

Introducing ICG Italia's large-format porcelain slabs, redefining countertops with their seamless elegance. These slabs effortlessly enhance kitchen space with their luxurious allure.

Designed for both durability and aesthetic appeal, our slabs transform countertops into stylish focal points, perfect for culinary endeavors and gatherings alike.

# Stone look

The spontaneous elegance of stones that have always been widely appreciated and used in architectural projects comes back to life and acquires a new design accent through surfaces that capture the eye for the meticulous refinement of the details.

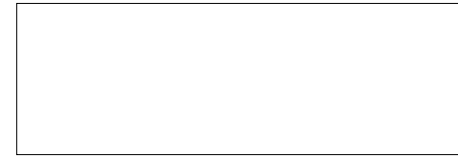

Their textures and material consistencies, intensely realistic and vibrant, arise from a careful study and reinterpretation of the natural materials and are the result of a productive philosophy that combines the use of cutting-edge technologies with a refined aesthetic sensitivity.

# Contemporary look

Continuously evolving stylistic experimentation and an advanced technological culture give life to surfaces conveying all the energy of construction materials with a pronounced expressive appeal, including concrete, resins, and other design inspirations.

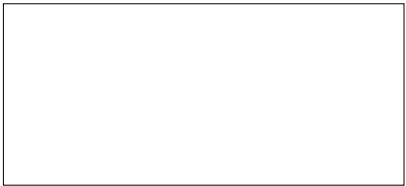

A selection of contemporary suggestions, proposing new harmonies between colors, nuances and details, opening the way to an extremely wide range of creative solutions.

To give full concreteness to the uniqueness of each design vision and transform living spaces into highly distinctive environments.

Porcelain slabs:  
12 mm, 20 mm

Marble look

# Beyond the surface.

The research into technological innovation conducted by Iris Ceramica Group, which SapienStone is part of, has taken a new step forward in re-engineering ceramics, evolving this material even further, which is something that has never been done before.

The full-body technology by Iris Ceramica Group has been perfected to the point that is now possible to create a technologically sophisticated surface that is unmatched in the market.

Iris Ceramica Group has taken ceramics to a whole new dimension: 4D Ceramics. As in nature, 4D ceramic surfaces are born through stratification and become granitic. As solid as rock, made up of natural minerals, all its history and the elements that create life – water, fire and earth – are encompassed in a 12 and 20 mm thick slab.

Visually speaking, the result is a ceramic surface that looks exactly the same throughout, on both the surface and its thickness. This is achieved by recreating natural veining, shades of color, geometric designs or patterns, thus completely blurring the boundary between a surface and its edge.

## TECHNICAL NOTES

The processing of natural raw materials, combined with the use of leading-edge patented production techniques, makes it possible to obtain high-tech materials characterized by typical full-body effects, a feature that has always been the exclusive hallmark of quarried marble and stone.

Chromatic variations, veining and speckling are thus prized characteristics of ICG materials, designed and produced to recreate the fascination of exclusive floorings, that reveal the randomness and beauty of natural materials. On the basis of the above statements, the colour references in the catalogues and samples are to be considered as approximate.

The slabs of the ICG collections are realized with a 100% full body, a compact and frost-proof mass and they are resistant to chemical attacks. For this reason they are a guarantee of stability and durability in the time, suitable for whatever use and destination, both interior and exterior, from the more classic and refined, to the most spacious and of intense utilization one.

For a better aesthetic result, is preferable to spread out the material with a 2-3 mm of joint, jointing with tone on tone colours.

The colours and appearance features of the products are as close as possible to reality, within the limitation of the printing process.

ICG keeps the right to change all the mentioned items without notice and declining any responsibility for direct or indirect damage caused from these changes.
