

Traditional Porcelain & Ceramic

COLLECTION 2025

COLLECTION 2025

Celebrating tradition: the timeless elegance of italian porcelain surfaces

The company

At ICG ITALIA, we don't merely offer Italian porcelain surfaces; we embody the essence of Italian tradition. Our commitment extends beyond fast fashion—it's about delivering timeless and classic Italian appeal that resonates across generations. Our luxurious ceramics are meticulously crafted in the picturesque town of Sassuolo, nestled within Italy's Modena province. This region boasts a rich heritage of artisanal craftsmanship, and we take immense pride in producing our surfaces there. We are proud heirs of Italian craftsmanship and passionate interpreters of the "Made in Italy" legacy.

High-end surfaces

Our expertise in high-end porcelain surfaces is multifaceted. Manufactured in Italy, where the finest porcelain is found, our slabs embody a legacy of craftsmanship. But it doesn't stop there. We integrate cutting-edge technologies into our products such as Design Your Slab (DYS), empowering customers to imprint custom designs onto our large-format surfaces, and 4D technology, which seamlessly infuses veining, patterns, and color variations throughout the material. These innovations, combined with an extended list of benefits, position us as providers of exceptional solutions in the market. When you choose our porcelain, you're not just selecting a surface; you're embracing a legacy of sophistication and quality.

Sustainable Excellence: ICG Italia's green building philosophy

Economy=Ecology We firmly believe that ecological responsibility and economic viability go hand in hand. Our production philosophy revolves around sustainable architecture, creating ceramics that excel in both technical and aesthetic performance while adhering to green building principles. Since our company's inception, environmental protection and pollution prevention have been woven into our corporate DNA. These principles drive our ambitious goals, setting us apart globally.

The phrase 'Economy =Ecology' encapsulates our ethos—a concept championed by our founder in the 1970s when ecological awareness was nascent. Today, it remains etched onto our production lines as a constant reminder. Whether our ceramic and porcelain surfaces grace residential kitchens or iconic commercial spaces, we honor nature. Sustainability isn't just a choice; it's an imperative. By marrying ecology and economy, we pave the way for a greener, more prosperous future—one surface at a time.

“Sustainability isn't
just a choice; it's an
imperative”

Traditional ceramic.

ICG know-how

Staying true to our roots, ICG ITALIA crafts modern ceramics that pay homage to tradition, elegantly embracing Italian design while remaining proudly Italian-made.

Inspired by the atmosphere experienced on entering a craftsman's workshop, this line leads us through a unique sensory heritage. Evoking tempting smells, captivating sounds, and enchanting shapes, this material rediscovers familiar sensations to fulfil a desire for beauty. A craftsman develops an intimate relationship with their raw material and their craft expresses a bond with the local area established through the tradition that has matured in their workshops. Taking its name from the Italian for these crafts workshops, ICG Italia explores a rare tradition that originates from the hands and mind, an exercise in manual skills and imagination that forms a world with special allure for ceramics.

A unique know-how in the world with plants protected by international patents, Full Body allows the production of a completely innovative material: homogeneous, compact, indestructible, safe, and eco-friendly.

CM2 Outdoor is the ideal solution for outdoor flooring: easy to install and extremely practical, it ensures aesthetic continuity between indoor and outdoor spaces

Diesel Living

Diesel Living with Iris Ceramica is one of the most innovative brands in the high quality ceramics sector.

Launched in 2015-2016, it combines unmistakable Diesel Living Style Office designs with Iris Ceramica R&D Department's expertise.

Constant dialog between culture, radically different approaches and diverse expertise focuses on a common vision, creating an unprecedented, powerful statement in contemporary style.

The collections, which received immediate acclaim from both the market and critics, are defined by their powerful experimental design ideas and cutting-edge visual impact.

Eye-catching Diesel Living with Iris Ceramica designs for walls and floors are at the forefront of diverse style concepts. They explore distant worlds and cultures, revealing a stunning, pioneering vision of the future

Contemporary Look

Continuously evolving stylistic experimentation and an advanced technological culture give life to surfaces conveying all the energy of construction materials with a pronounced expressive appeal, including concrete, resins, and other design inspirations.

A selection of contemporary suggestions, proposing new harmonies between colors, nuances and details, opening the way to an extremely wide range of creative solutions.

To give full concreteness to the uniqueness of each design vision and transform living spaces into highly distinctive environments.

WHITE WEAVE DECOR

WHITE LINE DECOR

Stone Look

The spontaneous elegance of stones that have always been widely appreciated and used in architectural projects comes back to life and acquires a new design accent through surfaces that capture the eye for the meticulous refinement of details.

Their textures and material consistencies, intensely realistic and vibrant, arise from a careful study and reinterpretation of the natural materials and are the result of a productive philosophy that combines the use of cutting-edge technologies with a refined aesthetic sensitivity.

Wood Look

The use of highly precise technologies is the key to creating surfaces that reproduce the features of wood essences with great architectural appeal with an unprecedented level of accuracy.

From proposals that faithfully reproduce veins, knots, and nuances of specimens existing in nature, to others inspired by the characteristic flavor of artisanal workmanship, the range of wood-effect selections strikes for realism, amplified by a perfect correspondence between graphics and tactile structures.

And so doing, with its variety, ensures to always find the right accent of stylistic personalization inspired by the spontaneous elegance of the natural material.

TARSIE ROVERE

Full Body 2 cm (Outdoor)

For all outdoor intervention needs, we developed a wide range of full-body surfaces, 2 cm thick, carefully designed and manufactured to combine aesthetic value and maximum technical performance.

Collections inspired by multiple looks and styles, also usable to create projects of total in & out continuity, suitable for any installation, from glued onto screed, to dry placement on gravel, sand, or grass, till to raised floors.

And, at the same time, exceptionally long lasting materials, thanks to their extreme resistance to atmospheric agents, pollution and other wear and tear factors, including the loads of vehicles in the case of the construction of driveways.

TECHNICAL NOTES

The processing of natural raw materials, combined with the use of leading-edge patented production techniques, makes it possible to obtain high-tech materials characterized by typical full-body effects, a feature that has always been the exclusive hallmark of quarried marble and stone.

Chromatic variations, veining and speckling are thus prized characteristics of ICG materials, designed and produced to recreate the fascination of exclusive floorings, that reveal the randomness and beauty of natural materials. On the basis of the above statements, the colour references in the catalogues and samples are to be considered as approximate.

The slabs of the ICG collections are realized with a 100%, a compact and frost-proof mass and they are resistant to chemical attacks. For this reason they are a guarantee of stability and durability in the time, suitable for whatever use and destination, both interior and exterior, from the more classic and refined, to the most spacious and of intense utilization one.

For a better aesthetic result, is preferable to spread out the material with a 2-3 mm of joint, jointing with tone on tone colours.

The colours and appearance features of the products are as close as possible to reality, within the limitation of the printing process.

ICG keeps the right to change all the mentioned items without notice and declining any responsibility for direct or indirect damage caused from these changes.
